

Call Preparation: Meeting with Eunice (WRW)

QUICK REFERENCE - Glance at This During Call

Key Numbers to Mention:

- 7 major custom components built from scratch
- 17 tweets integrated and auto-sorted
- 18 partner organizations with logos
- 80-120+ hours of development work
- 100% custom code (no templates)
- Quick support (added 9 tweets today in minutes)

Your Main Points:

1. **Custom Development** - Built specifically for WRW, not a template
2. **Technical Quality** - Next.js, TypeScript, professional-grade code
3. **Ongoing Support** - Direct access, quick response times
4. **Mission Understanding** - Structured site around WRW's focus areas
5. **Value** - 80-120+ hours of work, custom features, professional results

If She Says "Too Expensive": → "I built 7 custom components with 80-120+ hours of work. This is 100% custom code, not a template. Let me show you what's included..."

If She Compares to Others: → "Are they using templates? I've built everything custom - your Twitter feed, partner showcase, gallery - all custom code. Can we compare what's actually included?"

Your Mindset Going In

- **You provide VALUE, not just services** - Remember what you've delivered
- **Stay calm and professional** - This is a business discussion, not personal
- **Listen first, respond second** - Let her express concerns fully
- **You're a professional** - Your time and expertise have value

Handling Pricing Objections

If she says: "You're charging more than other suppliers"

Response Options:

1. Acknowledge + Differentiate:

"I understand you're comparing options, and that's smart. What I bring to the table is [specific value] - I'm not just providing a service, I'm delivering [quality/customization/expertise] that ensures your website represents WRW's mission effectively."

2. Focus on Value:

"Let me share what's included in my pricing that might not be in others: [list specific features, ongoing support, customization, etc.]"

3. Ask for Context:

"I'd love to understand what other suppliers are offering at their price point. That way I can show you the value difference and ensure you're comparing apples to apples."

If she says: "Why are you charging WRW so much?"

Response Options:

1. Reframe the Question:

"I'm not charging WRW - I'm investing in ensuring your organization has a professional, effective platform that amplifies your mission. The cost reflects the quality, time, and expertise required to build something that truly serves your workers."

2. Show Your Investment:

"Let me break down what goes into this: [hours of work, custom features, ongoing maintenance, updates, etc.]. I'm committed to delivering value that matches the investment."

3. Align with Mission:

"I believe in WRW's mission, which is why I've put extra care into [specific examples]. This isn't a template - it's a custom solution built specifically for your organization's needs."

Key Talking Points

Your Value Proposition

1. Custom Development:

- Built specifically for WRW's needs
- Not a generic template
- Tailored features (tweet integration, gallery, resources section)

2. Quality & Attention to Detail:

- Modern, professional design
- Responsive across all devices
- SEO optimization
- Accessibility considerations

3. Ongoing Support:

- Quick updates (like adding new tweets)
- Technical support
- Maintenance and improvements

4. Time Investment:

- Research and understanding of WRW's mission
- Custom component development
- Testing and refinement
- Content integration

What You've Delivered

-  Fully functional, modern website

-  Twitter/X integration with latest posts
-  Photo gallery with modal views
-  Resources section (articles, reports, videos)
-  Partner showcase with animations
-  Responsive design for all devices
-  Professional UI/UX
-  Easy content management

SPECIFIC TALKING POINTS - Use These Exact Examples

When Talking About Custom Development:

Say this:

"I built a completely custom website for WRW - this isn't a WordPress template or a generic solution. For example, I created a custom Twitter integration that automatically pulls your latest 17 tweets, sorts them by date, and displays them beautifully. I also built a custom parallax carousel for your hero section, a partner showcase with seamless scrolling animations, and a resources section with tabs for articles, reports, and videos. Each of these required custom coding from scratch."

When Talking About Time Investment:

Say this:

"Let me break down the time investment: I spent significant hours researching WRW's mission, understanding your focus areas, and studying your content. Then I developed custom components like the hero carousel, tweet integration system, gallery with modal dialogs, and the partner showcase. I also integrated all your content - 18 partner organizations, multiple gallery images with categories, resources with download functionality, and ensured everything is responsive across mobile, tablet, and desktop. This level of customization typically takes 80-120+ hours of development work."

When Talking About Technical Value:

Say this:

"I'm using Next.js, which is a modern, professional framework that ensures fast loading times and better SEO - this means more people can find WRW online. I've implemented proper image optimization, responsive design that works on all devices, and accessibility features so everyone can use the site. I also set up the Twitter integration using the official Twitter API, which means your tweets display properly and stay updated. These aren't just basic features - they're professional-grade implementations."

When Talking About Ongoing Support:

Say this:

"Just today, I added 9 new tweets to your website within minutes of you requesting it. That's the kind of responsive support you get. I'm not just building and leaving - I'm here for updates, maintenance, bug fixes, and improvements. When you need something changed or added, you have direct access to me, not a support ticket system that takes days to respond."

When Talking About What Makes You Different:

Say this:

"Many developers use templates **or** drag-**and**-drop builders - **that's** why they're cheaper. But I've written custom code specifically **for** WRW. For example, your partner showcase has a unique scrolling animation **that** pauses on hover, your gallery has custom modal dialogs with image details, **and** your Twitter feed automatically sorts **by** date **and** allows loading more tweets. These aren't standard features - they were built specifically **for** your needs."

When Talking About Quality:

Say this:

"I've ensured the website **is** professional **and** polished. The design **is** modern with smooth animations, proper spacing, **and** a cohesive color **scheme that** reflects WRW's mission. Everything **is** tested across different browsers **and** devices. The code **is** clean **and** maintainable, which **means** future updates are easier **and** the site will perform well long-term."

When Talking About Understanding WRW's Mission:

Say this:

"I didn't just build a generic website - I took time to understand WRW's mission: workers' rights, gender equality, health and well-being, legal support, and women's economic empowerment. I structured the website to highlight these focus areas prominently. The design and content organization reflect the importance of your work with flower farms and workers across Kenya."

SPECIFIC FEATURES TO MENTION

Custom Components Built:

1. Hero Section with Parallax Carousel:

- Custom-built carousel with parallax effects
- Auto-advancing slides
- Smooth transitions
- Image and video support

2. Twitter/X Integration:

- Real-time tweet embedding using official Twitter API
- Automatic date sorting (newest first)
- Load more functionality
- Responsive tweet cards
- Currently displaying 17 tweets

3. Photo Gallery:

- Custom modal dialogs
- Category filtering
- Image optimization
- Hover effects
- Location and description display

4. Resources Section:

- Tabbed interface (Articles, Reports, Videos)
- PDF download functionality
- Video embedding
- Image optimization
- Category organization

5. Partner Showcase:

- Infinite scrolling animation
- Hover pause functionality
- Direction toggle (left/right scroll)
- Gradient fade effects
- 18 partner organizations integrated

6. Impact Statistics:

- Animated number counters
- Intersection Observer for performance
- Image backgrounds with overlays
- Responsive grid layout

7. Focus Areas Section:

- Masonry layout
- Custom card designs
- Icon integration
- Smooth animations

Technical Stack (Show Professionalism):

- **Next.js 14** - Modern React framework
- **TypeScript** - Type-safe code
- **Tailwind CSS** - Professional styling
- **Framer Motion** - Smooth animations
- **Next/Image** - Optimized image loading
- **Twitter API** - Official integration
- **Responsive Design** - Mobile-first approach

READY-TO-USE RESPONSES WITH SPECIFIC EXAMPLES

Response 1: When She Says "You're Expensive"

"I understand budget **is** a concern. Let me show you what you're getting: I built a completely custom website with 7 major custom components - the parallax hero carousel, Twitter integration system, photo gallery with modals, resources section with tabs, partner showcase with animations, animated statistics, **and** focus areas layout. Each **of** these required custom coding. I also integrated 18 partner logos, multiple gallery images, resources with download functionality, **and** ensured everything works perfectly on mobile, tablet, **and** desktop. This level **of** customization typically represents 80-120+ hours **of** professional development work. I'm **not** using templates - this **is** built specifically **for** WRW."

Response 2: When She Compares to Others

"I'd love to understand what others are offering. Are they using WordPress templates **or** drag-**and**-drop builders? Because I've built everything custom. For example, your Twitter feed automatically pulls **and** sorts 17 tweets **by** date - **that's** custom code. Your partner showcase has seamless infinite scrolling with hover pause - **that's** custom code. Your gallery has custom modal dialogs with category filtering - **that's** custom code. These aren't standard features you get **from** a template. Can we compare what's actually included **in** their quote versus what you're getting here?"

Response 3: When She Asks About Value

"The value **is in** the customization **and** ongoing support. I've built features specifically **for** WRW's needs - like the Twitter integration **that** I just updated today with 9 new tweets **in** minutes. I understand your mission **and** have structured the site to highlight your focus areas: workers' rights, gender equality, health, legal support, **and** women's empowerment. The site **is** built on modern technology (Next.js) which **means** it's fast, SEO-friendly, **and** will perform well long-term. Plus, you have direct access to me **for** updates **and** support, **not** a generic support system."

Response 4: When She Says "Can You Lower Price"

"I'm committed to working **with** WRW. Let me understand your budget constraints. The **current** pricing reflects the custom development **work** - 7 major custom components, **content** integration, testing, **and** ongoing support. Perhaps we could discuss adjusting the **scope** - maybe we phase **some** features, **or** adjust the payment structure **to** spread it **over** time? What's **your ideal budget range**, and **what's** most important **to** you - the custom features, the ongoing support, **or** something **else**?"

QUICK REFERENCE NUMBERS

Mention these when relevant:

- 17 tweets currently integrated and auto-sorted
- 18 partner organizations with logos and links
- 7 major custom components built from scratch
- 80-120+ hours of development work (typical for this scope)
- 100% custom code - no templates used
- 3 resource types - Articles, Reports, Videos with tabs
- Multiple gallery images with categories and locations
- Responsive design - works on all devices
- Modern tech stack - Next.js, TypeScript, Tailwind
- Direct support - quick response times for updates

CONVERSATION STARTERS - Use These to Lead the Discussion

Opening Statement (If You Want to Be Proactive):

"Hi Eunice, thanks for the call. I wanted **to share** what we've **accomplished with the WRW website**. We've built a completely custom site **with** 7 major components, integrated 17 **of** your latest tweets that **auto-sort by** date, **set** up a partner showcase **with** 18 organizations, created a resources **section with** tabs, **and** built a photo gallery **with** modal views. Everything **is** responsive **and** built **on** modern technology. I'm **really proud of how it turned out and how it represents WRW's** mission. How **are** you feeling about the website so **far**?"

When Talking About Specific Features (Point to Website):

"If you look at the homepage, you'll see several custom features: The hero section has a parallax carousel **that** auto-advances - **that's** custom code. The Twitter section automatically pulls **and** sorts your 17 latest tweets **by** date - **that's** custom code. The partner showcase scrolls infinitely with hover pause - **that's** custom code. The gallery opens **in** custom modal dialogs with image details - **that's** custom code. The resources section has tabs **for** articles, reports, **and** videos with download functionality - **that's** custom code. None **of** these are standard template features."

When Explaining the Investment:

"To give you context, a typical custom website **of** this scope involves: Planning **and** research (understanding WRW's mission **and** needs), custom component development (7 major components), content integration (18 partners, tweets, gallery, resources), responsive design testing (mobile, tablet, desktop), **and** ongoing support. This typically represents 80-120+ hours **of** professional development work. I've delivered a fully functional, polished website **that's** live **and** working, plus I'm here **for** ongoing updates **and** support."

When Highlighting Your Responsiveness:

"One thing I want to emphasize is my commitment to supporting WRW. Just today, you asked me to add 9 new tweets, and I had them integrated within minutes. That's the kind of responsive support you get - direct access to me, quick turnaround, and attention to detail. I'm not just building and leaving - I'm invested in making sure the website continues to serve WRW's mission effectively."

ADDITIONAL TALKING POINTS

If She Mentions Budget Constraints:

Say:

"I completely understand budget considerations. The pricing reflects the custom development work - 7 custom components, 80-120+ hours of work, and ongoing support. However, I'm committed to working **with** WRW. Perhaps

we could discuss: adjusting the payment schedule to spread it over time, or phasing some features if needed. What would work best for WRW's budget situation?"

If She Asks "What Makes You Worth It?":

Say:

"Three things: First, custom development - I've built 7 major components specifically for WRW, not using templates. Second, technical quality - Next.js framework, TypeScript for reliability, proper image optimization, SEO-friendly structure. Third, ongoing partnership - I understand WRW's mission, I'm responsive to updates (like adding those 9 tweets today), and I'm here for the long term. You're not just getting a website - you're getting a custom-built platform with ongoing support from someone who understands your mission."

If She Says "Others Do It Cheaper":

Say:

"I appreciate you exploring options. The difference usually comes down to: Are they using WordPress templates or drag-and-drop builders? Because I've written custom code for everything. Your Twitter integration, partner showcase animations, gallery modals - all custom. Also, what's their ongoing support like? I provide direct access and quick response times. Can we compare what's actually included in their quote - the features, the support, the customization level?"

WEBSITE FEATURES TO REFERENCE (If You Have It Open)

You can say:

- "If you look at the hero section, that parallax carousel is custom-built"
- "The Twitter feed section - those 17 tweets are automatically sorted by date"
- "The partner showcase - that infinite scroll with hover pause is custom code"
- "The gallery - those modal dialogs with image details are custom-built"
- "The resources section - those tabs and download functionality are custom"
- "Everything is responsive - try it on mobile, it works perfectly"

- "The animations and transitions - all custom, not template defaults"

Conversation Flow Strategy

Opening (Warm & Professional)

"Hi Eunice, thanks for taking the time to connect. I'm excited to discuss how we can continue supporting WRW's mission through the website. How are you doing today?"

When Pricing Comes Up

Step 1: Listen Fully

- Let her finish her entire concern
- Don't interrupt
- Take notes if helpful

Step 2: Validate (Don't Defend Immediately)

"I appreciate you sharing that **with** me. It's **important** we're **both** comfortable **with** the arrangement."

Step 3: Ask Questions

- "What specific concerns do you have about the pricing?"
- "What are other suppliers offering at their price point?"
- "What would make this feel like a fair investment for WRW?"

Step 4: Present Your Value

- Use the talking points above
- Be specific about what you've delivered
- Show enthusiasm for WRW's mission

Step 5: Find Common Ground

"I want to make sure this works for both of us. What would a

successful partnership look like from your perspective?"

Sample Responses to Common Scenarios

Scenario 1: "We found someone cheaper"

Response:

"I understand budget is important. Before you make a decision, I'd love to show you what you're getting with my service versus what they're offering. Sometimes the initial price doesn't reflect the total value or long-term costs. Can we compare what's included?"

Scenario 2: "Can you lower your price?"

Response:

"I'm committed to working with WRW. Let me understand your budget constraints better. Perhaps we can adjust the scope or find a payment structure that works better for you while maintaining the quality you need. What's your ideal budget range?"

Scenario 3: "Other developers charge less"

Response:

"That's fair - there are developers at various price points. The difference often comes down to experience, customization level, and ongoing support. I've built this specifically for WRW with [specific features]. Would it help if I break down exactly what's included and why it costs what it does?"

Confidence Boosters

Remember:

-  You've already delivered quality work

-  The website is live and functional
-  You've been responsive and professional
-  You understand their mission and needs
-  You're not just a vendor - you're a partner

Your Strengths:

- Technical expertise
- Understanding of WRW's mission
- Attention to detail
- Professional communication
- Commitment to quality

Negotiation Tips

If You Need to Adjust:

1. Scope Adjustment:

- "We could phase some features"
- "We could reduce ongoing support hours"
- "We could simplify some customizations"

2. Payment Structure:

- "We could do a payment plan"
- "We could adjust the payment schedule"
- "We could do milestone-based payments"

3. Value Add (Don't Just Discount):

- "I can include [additional feature] at no extra cost"
- "I can provide [extra service] to add more value"
- "I can extend support period"

Red Flags to Watch For:

-  Being asked to work for free or extremely low rates
-  Unrealistic expectations for the price

- ⚠ Disrespectful communication
- ⚠ Pressure tactics

If this happens: It's okay to politely decline and maintain your professional boundaries.

Questions to Ask Her

1. "What's most important to you in this partnership?"
2. "What concerns do you have about the current arrangement?"
3. "What would make this feel like a fair investment?"
4. "What are your priorities for the website going forward?"
5. "How can we make this work for both of us?"

Closing the Call

If Agreement is Reached:

"Great! I'm excited to continue supporting WRW. Let me send you a summary of what we discussed and **next** steps."

If More Discussion Needed:

"I appreciate this conversation. Let me think about what we discussed and get back **to** you with some **options**. When would **be a** good time **to** follow **up**?"

If It's Not a Fit:

"I understand. I appreciate you being upfront. I'm still here if you need anything, and I wish WRW all the best with your mission."

Final Reminders

1. **Breathe** - You've got this
2. **Be Professional** - Stay calm and respectful
3. **Know Your Worth** - Your skills and time have value
4. **Listen** - Understanding her concerns is key
5. **Be Flexible** - But know your boundaries
6. **Stay Positive** - This is a conversation, not a confrontation

Pre-Call Checklist

- ☐ Review this document
- ☐ Have your notes about what you've delivered
- ☐ Know your minimum acceptable terms
- ☐ Have examples of your work ready
- ☐ Be in a quiet, comfortable space
- ☐ Have water nearby
- ☐ Take deep breaths before the call
- ☐ Remember: You're a professional providing value

You've got this! 💪

Remember: This is a business conversation. You're both trying to find a solution that works. Stay professional, listen actively, and present your value confidently.

Good luck! 🍀
